Drive: 3/8" Sqr

SHIPPING WEIGHT: 0.61 Kg

FEATURES

- Used for removing damaged, stripped, rusted or painted fasteners (screws/nuts/bolts) of all types
- To remove damaged bolts, tap the extractor onto the head of the bolt and remove the bolt in the same direction you would normally use to remove the fastener
- Works well even on flush mounted bolts and nuts.
- Designed for use in areas where space is limited
- Can be used with either spanners or sockets
- Special 6-flute spiral design draws itself onto the fastener allowing it to loosen
- The remover spline cuts into the bolt head or thread to provide a secure grip
